CNC Cutting Solutions

1000 SERIES
WATERJET

POWERED BY

KMT Waterjet Systems™

The low-cost MultiCam 1000W Series pure water jet is equipped with standard features normally only found on more expensive CNC waterjet cutting machines. The 1000W Series WaterJet features dual drives, an engineered aluminum extrusion frame, 25mm bearings throughout, and a state-of-the-art KMT Water Jet System, as well as the legendary ease-of-use of the MultiCam Controller. For companies looking for value in a water jet cutter, the 1000W Series is the perfect solution.

1000 Series WaterJet Standard Features:

No machine offers more standard features than the MultiCam.

- Custom engineered aluminum extrusion design for high strength and rigidity.
- High-Speed contouring
- User-friendly MultiCam Controller
- Material Database
- Precision dual X-axis drives
- 8 Megabytes of Memory with unlimited file size transfer capabilities
- Standard Ethernet or RS232 direct connections
